

How can people protect moths?

That's easy! By planting seeds and keeping the environment clean and safe

This is the biggest moth in the world. It can be a foot long! Its name is the Hercules Moth.

All About Moths

Moths are intelligent species.

Most only come at night.

Their bodies are bigger than a butcher fly.

More about moths

This is the smallest moth in the world

Why are moths important?

They help the ecosystem to be food. They pollinate lots of plants.
